

Table 17 Portion of the **equivellipse.COM** file generated automatically by "GENTEXT" that corresponds to the GENOPT user's input listed in Table 15. GENOPT inserts these labeled common blocks and variable declarations in all the FORTRAN libraries listed in Table 7. This list forms part of the complete equivellipse.COM file that appears in Table a6 of the appendix. The complete equivellipse.COM file exists when the GENOPT user has completed the interactive "GENTEXT" session. This table is analogous to Table 9.
